

# ELIGIBILITY VERIFICATION SYSTEM INCREASES PROFITS IN SECONDS

## Revenue Leakage Area

- Experts estimate 8-10% of all denials are due to eligibility issues.
- As much as 30% of provider revenue comes directly from the patient.
- Studies show 58% of all bad debt comes from patient balances.

## Simplicity + Time Savings + Cost Savings = INCREASED PROFITS

### Simplicity

- Real-time connectivity covering nearly all of the typical provider's patient mix.
  - Easily accessible with the internet.
  - Insurance responses "normalized" in an easy-to-read format.
- Collect patient payments when you integrate with our financial services.

### Time Savings

- MBA's single interface shortens the patient check-in process by providing access to beneficial information from hundreds of insurance companies in mere seconds.
- Our scheduled batch upload feature allows you to learn the status of coverage for patients, days before their appointments.
  - The easy-to-use integrated solution reduces employee costs of calling, faxing, and online searching for benefits verifications at individual payers.
  - Benefit responses are available, searchable and archived.

### Cost Savings

- Reduced rejections: Clients who verify benefits experience significantly fewer rejections as a result of incorrect demographic or plan information.
- MBA's automated Eligibility Verification solution has proven to deliver up to 75% cost savings over manually verifying coverage.

## Our "No Obligation" Opportunity to Enhance Your Revenue Now

For a limited time, we are offering practices the opportunity to try our Eligibility Verification Solution for FREE (a \$500 VALUE) with absolutely no obligations. Simply evaluate the system for 60 days and learn how it can help reduce claim rejections, increase patient collections and lower costs. MBA clients report this system pays for itself by cleaning up just one claim per month!!
